ONE FOCUS: ASSET SERVICING

CACEIS devotes all its resources to asset servicing in order to provide optimal solutions for demanding clients seeking an expert partner that is both innovative and financially solid. We allocate our capital to ensure client assets are fully protected. We focus investments on hiring and retaining experienced staff as well as on the IT tools they need to provide high service levels to clients. We offer clients a rigorous compliance system that promotes the stable and sustainable development of their business activities.

THE POWER TO INNOVATE

CACEIS is constantly investing in its IT systems and in designing innovative services adapted to each of its clients. In this context CACEIS has added to its market access solutions, developed a portfolio rating service based on Environmental, Social and Governance (ESG) criteria, and designed a new Class Action offer. The Data Analytics approach offered to management companies uses Big Data technology to provide an analysis of their investors' behaviour.

After the Olis Mobile app in 2017, CACEIS has earned further recognition in 2018 with a best innovation award for its collaborative platform TEEPI, a financial application that covers Solvency II, PRIIPs and MiFID II regulatory requirements for institutional investors, management companies and distributors. CACEIS has implemented its digital transformation plan and established a 3D (Digital-Data-Dissemination) business line to keep up with changes in the asset servicing industry in an agile, innovative way.

A SOCIALLY RESPONSIBLE PARTNER

For CACEIS, a social, societal and environmental approach represents a source of value creation in a changing environment. They fully reflect the Crédit Agricole group's CSR (Corporate Social Responsibility) strategy. With business ethics as its common thread, CACEIS helps its clients to anticipate and manage their risks, taking into account the legal, regulatory and professional rules that govern their various activities. Committed to being a responsible employer, it is pursuing a social policy geared to providing support in dealing with the strategic challenges and transformations facing the company. By promoting diversity, fairness and the quality of life at work, CACEIS underscores its societal commitment. Lastly, the resources used for its actions are environmentally friendly.
